

# Depot Drop Off Points

---

Fitz Scientific has Depot Drop Off locations for customers both in Dublin and Waterford.

1. If you wish to drop off samples at the Depot, you must contact our **Field Services team** by email at [fsteam@fitzsci.ie](mailto:fsteam@fitzsci.ie) or by phone at **041 9845440 Ext. 3** no later than **2:00 p.m.** the day before. Drop-off is permitted only once approval has been granted.
2. The Digital Chain of Custody (DCOC) must be completed through Web Portal **before** drop-off, as we require the 4 Digit Sample Submission Code that relates to your samples.

## Same Day Collection Cut Off Points:

- **Dublin Depot:** Samples must be dropped **before 2:00pm** for same day collection.
- **Waterford Depot:** Samples must be dropped **before 1:00pm** for same day collection.

## To avail of the Depot Drop off service, please:

Notify our team by E-mail [fsteam@fitzsci.ie](mailto:fsteam@fitzsci.ie) or Phone 041 984 5440 Ext 3 and provide the following information:

- Company name
- 4-digit Sample Submission Code
- Number and Type of samples (Food, Surface Water, Solid, etc)
- Which Depot Drop Off you will use

Once approval has been given you will receive the access code and padlock code for the Depot and a copy of the Handover Slip required to accompany your samples.

## To access the Depot:

- Upon entry, dial in the access code on the security pad beside the yellow door.
- The access code needs to be used even if another customer is dropping a package and already has the main door open.
- Do not leave the door unattended at any time or allow any unauthorised people into the facility.
- Find the appropriate unit (**36A Dublin or G97 Waterford**) shown below and input the padlock code.
- Please leave your completed Handover Slip with your samples. You should have received a copy of the Handover Slip from Field Service team organising the collection, however there should also be a supply of the Handover Slips inside of the unit.
- You must lock the padlock when leaving the Fitz Scientific unit.
- You must dial the access code again when you are leaving the facility on the inside security pad, which can be found before leaving the main door.

**Note:** It is not required to put Soil or Solids samples in the fridge, these can be left on the shelves beside the fridge. **Fridge should be used for Food/Water samples only.** Cooler boxes with ice packs can be left on the shelves beside the fridge. Ensure your 4-digit code is written on each of the samples you are leaving at the depot.
